

111 What is claimed is:

1) A cover for the bed of a truck/trailer composed of a plurality of segments overlying said bed and overlying the portions of said truck/trailer surrounding the front, sides and back of said bed, comprising,

116 A) a frame secured to and forming the top of the sides and front of the truck/trailer surrounding the bed thereof, said frame including a pair of laterally spaced side members secured to the top of the sides of said bed and a front member secured to the top of the front of said bed and secured to both of said side members,

B) a front, a back, and a pair of intermediate cover segments intermediate said front and back segments, with each of said segments overlying both of said side members, said front segment also
121 overlying said front member, and said back segment also overlying the portion of said truck/trailer surrounding the back of said bed,

C) said back segment and the rearmost of said intermediate segment being hinged together and said front segment and the most forward of said intermediate segment being hinged together,

D) each of said segments including means for releaseably locking said segment to both of said side
126 members, and

1) a first trough means between said back segment and said intermediate member hinged thereto,

2) a second trough means between said pair of intermediate segments, and

3) a third trough means between said front segment and said intermediate hinged thereto,

131 E) both of said side members include a plurality of slots and said trough means extend laterally and through said slots and beyond said side members.

2) A cover according to claim 1 wherein said intermediate segments include means for locking them together.

136 3) A cover according to claim 3 wherein said locking means on said front and rear segments include an actuating means accessible from the outside of said segment.

4) A cover according to claim 3 wherein said locking means on each of said intermediate segments include an actuating means accessible from under said segment.

141 5) A cover according to claim 1 wherein each of said trough means includes a "U" shaped trough member carried by one of said segments and underlying a vertically extending wall formed on the adjacent one of said segments
